British Quality
British Service

Made in the
United Kingdom

Welcome to your new Trade Catalogue

We are celebrating 45 years of supply to our valued customers. To mark this milestone we are announcing another expansion to our product range, adding new traditional and contemporary designs with the same Bathex quality. We hope you will continue to make Bathex your supplier of choice.

Friction Single Concealed Fix
Hinged Support Rail

At Bathex we aim to make your life that little bit easier so you can get on with supplying your customers as we make sure you are getting what you need – quotations returned in the same day, great products, great value and great service.

We make this choice simple, offering British made goods manufactured in Birmingham, at competitive prices with consistently high quality. UK supply means you don't have to worry about long lead times and supply chain issues.

It also means we can work with you to develop new products and meet your changing requirements faster and more reliably.

Our average delivery time is just 72 hours and 99.5% of products are shipped in the week that they are ordered.

Bespoke Products

As a UK manufacturer we are able to offer our customers a bespoke design service for low volume components that you can't find in the catalogue. We normally deal with two sorts of bespoke requests, product variants and new/bespoke designs.

Product variant

The most common request is for a variation to an existing product. This includes minor specification changes for example - a little longer grab rail, a slightly different angle or a change of position to the fixturing. In most of these cases we can provide a quote the same day.

CASE STUDY

The problem; Our customer needed an L Shaped Grab Rail with non-standard dimensions of 900mm high and 300mm wide.

The solution; We manufactured an L Shaped Rail to the required size and delivered in just three days. Customer happy.

Bespoke design

A less common request is for a completely new design. Using our flange and tube system we have the ability to bend, add flanges and add ribbing which means we can manufacture any number of bespoke configurations. Working with our designers you can commission a completely unique rail to fit your scenario.

CASE STUDY

The problem; Our customer sent us this photo and asked us to design a suitable hand rail around these steps.

The solution; We designed a new rail in two parts and agreed the design with our customer. It was manufactured within two weeks and fitted perfectly. Customer was very happy.

These products due to their bespoke nature may incur additional engineering charges, but we will make these charges clear in your quotation. Responsibility for the design of a bespoke product rests with the customer. If we do not feel that a design is appropriate we may either decline to quote or suggest amendments, but the final responsibility remains with the customer.

Our Warranties

We try and keep things simple, so, within the warranty periods detailed here, if it is our responsibility that something has gone wrong with the design, materials or manufacture of one of our products then we will replace, repair or refund the product at our discretion.

10 YEAR DISTINCTION WARRANTY

Bathex offer an extended 10 Year Warranty* for all the Distinction range products.

3 YEAR STAINLESS WARRANTY

Bathex offer an enhanced 3 Year Warranty* on all Stainless Steel products.

1 YEAR STANDARD WARRANTY

Bathex offer a minimum 1 Year Warranty* on all products.

* See warranty terms on page 89.

Helping you choose the right product

These pages are here to help inform you about some of the choices available in selecting the right product for your needs. If you have any questions that are not answered here, please speak to our Sales Team.

Call 0121 706 4122
or email sales@bathex.co.uk

What material should I select?

The choice of material for your product is probably one of the most important decisions you have to make. Many of our ranges come in either 'mild' steel or 'stainless' steel. These materials have similar properties in terms of strength and durability but perform very differently when exposed to moisture.

Stainless Steel

If you select a stainless steel version of any of our products you can be confident that the product can be used in wet, damp or moist environments. The nature of the stainless steel material means it is not susceptible to pitting or rusting when exposed to water. This material should be selected for wet rooms, showers and bathrooms where water exposure is high.

Stainless Steel products are covered by a 3 Year Warranty*

* See warranty terms on page 89.

Mild Steel

If you select a mild steel version of any of our products you can be confident that the product will be durable in dry environments. This means that prolonged exposure to moisture will eventually cause first cosmetic damage, then potentially weaken the strength of the product. These products can be selected for dry areas and general use around the home or building.

Mild Steel products are covered by a 1 Year Warranty*

* See warranty terms on page 89.

What finishes are available?

All of our products can be manufactured in a selection of high quality finishes and colours.

Mirror Polish

For our stainless steel products we offer the ultimate in bright clean finish with this high-quality hand finished option. It is both durable, easy to maintain and is the perfect finish for the home and high-end installations.

Sateen Polish

If you are seeking a warmer matt finish for your stainless steel products then select this sophisticated smooth finish. Often selected for high-usage locations it provides a high-end look and feel which is easy to clean and maintain.

Powder Coated Paint Finish

A tough, oven baked coloured finish that provides a smooth and consistent coating for any of our mild or stainless steel products. We offer a standard range of popular colours, and at additional cost we can match colours to your specific requirements.

Chrome Plated Finish

A traditional option for a bright metallic finish that is available for some of our mild steel products. This finish was often used to extend the life of mild steel products in moderately damp environments.

What about even more grip?

It is possible to order our grab rails with additional plastic ribbing. This provides an enhanced level of grip for those who need more confidence. Please note ribbed grips are not recommended for wet environments.

What are the wall mounting options?

Our products are relied upon to provide security in what can be vulnerable situations. It is therefore critical that the products are mounted correctly and securely.

We offer a range of mounting options designed to provide security with style. There are three main options to consider all of which have three screw holes in each mounting.

DST

Low-profile Concealed Fixings

For use in high-end and home installations, the fixturing is low profile and entirely hidden. These are used in our Distinction range products.

Turn to page 6

Concealed Fixings

For an improved visual appearance the fixturing is hidden but provides a large footprint for securing the products. This style is used in our Professional range.

Turn to page 26

PRO

Exposed Flange Fixings

For use in public installations or where it is acceptable for the fitting to be exposed. This is a lower cost option and appears in our Essential range where value is the primary driver.

Turn to page 48

ESS

What size, shape and diameter can you offer?

We offer an enormous range of sizes, shapes and diameters of products with ranges that are straight, cranked, L shaped and curved.

Shape

The most important decision on size and shape is that it must provide the necessary safe support and benefit to the user. This means it must facilitate the user's activity by providing grip in a natural ergonomic position. There are many guides and regulations regarding the fitting of such accessories, if you are in any doubt please contact our Sales Team.

Handed Products

Throughout the catalogue we refer to some of our products as right or left hand. It is important that you look closely at the detailed product information for each product to ensure you select the correct hand product for your installation.

Sizes

The question of size and shape is often constrained by the space that you have available in your location. We provide most of our ranges in commonly used standard lengths and common shapes. As an example, our grab rails come in lengths from 300mm to 750mm, for longer spans fixturing is designed in to ensure strength and security.

Tube Diameter

Whilst all our products comply with the British Standards the larger the diameter of product you select the more loading can be applied. For our 25mm diameter products we recommend loading of less than 120kg, for the 35mm products we recommend a maximum loading of 170kg.

Special Sizes

If the size or shape you require is not in the catalogue please give us a call to see if we can meet your needs. As a UK manufacturer, we can let you know very quickly if your requirement is something we can provide.

I need a hinge rail; do I need a double arm version with a drop down leg?

We offer a wide range of hinged rails for toilet and shower installations. There are single arm and double arm versions and a choice of rails with and without drop-down legs. Here you must consider both the frequency of use and the likely size of the user(s).

Single Arm or Double Arm

A single rail will provide stabilisation to your user up to a maximum loading of 130kg. A double rail will provide enhanced stability and will take a load bearing up to 170kg.

Drop Down Legs

A hinged rail with a drop down leg provides additional stability and security. The use of drop down legs does not increase the load bearing capability of the rails.

Friction or Slotting

Our friction hinged rails and shower seats improve the ease of use for those with more limited capabilities

The friction hinge makes dropping and engaging the rail or seat easier with a smoother action. Slotted rails need to be lifted from a locked position to be lowered by the user.

DISTINCTION

10 YEAR DISTINCTION WARRANTY

Bathex offer an extended 10 Year Warranty* for all the Distinction range products.

* See warranty terms on page 89.

The Distinction range consists of two main product families, our contemporary Yardley design with a modern angular appearance and the more traditional Knowle design with its classic curves. Both benefit from the same graceful, low-profile fixturing.

For public environments consider the robust 35mm products, whereas for domestic applications with less intensive use take a look at the sleeker 25mm versions. All of these premium products are backed by our 10 year warranty and are available in a range of beautiful finishes and a wide range of colour options.

Exclusive designs,
and superior
materials in both
contemporary and
traditional styling.

25mm Stainless Steel

- Curtain Rails are modular and are joined using black connectors to aid delivery and installation. They can be manufactured as a single piece and to customer specification on request.
- Ceiling stays are recommended for rails used in shower scenarios due to the additional weight of a wet curtain. These are fitted during manufacture and cannot be added later.
- Ceiling Stays are 500mm long as standard and can be cut to length on site. Longer stays can be manufactured on request.
- Fixing holes to fit size 8 screws.

The Professional range is our most extensive product offering aimed at applications that need to balance appearance, function and value for money. The products are tried and tested and deliver excellent quality and durability. Most of the designs incorporate concealed fixings for enhanced visual styling. It also contains our most comprehensive range of hinged support rails, and even specialist products such as our Anti Ligature range.

If you cannot find exactly what you need in this range, our sales team would be happy to discuss your specific requirements.

1 YEAR STANDARD WARRANTY

Bathex offer a minimum 1 Year Warranty* on all products.

3 YEAR STAINLESS WARRANTY

Bathex offer an enhanced 3 Year Warranty* on all Stainless Steel products.

* See warranty terms on page 89.

The Professional range makes your choice easy, you are getting the best products at the best prices.

If you are looking for compliant products that meet tough cost targets you'll find these in our Essential range. These products meet all UK quality standards so you can rely on them to meet your customers' requirements. These products will be used in installations where cost and functionality are the primary drivers.

Our Essential products have exposed fix flanges and mounting plates which are robust and functional. For concealed fix products which provide improved visual appearance please refer to our Professional range.

1 YEAR STANDARD WARRANTY

Bathex offer a minimum 1 Year Warranty* on all products.

3 YEAR STAINLESS WARRANTY

Bathex offer an enhanced 3 Year Warranty* on all Stainless Steel products.

* See warranty terms on page 89.

Sometimes you just need the simplest solution, you'll find these in our Essential range.

Trading Terms and Conditions

Carriage

Carriage will be charged on order/net invoice values for individual deliveries less than:

- £200 England and Wales
- £300 Scottish Lowlands
- £400 Scottish Highlands and Isle of Wight
- £600 Northern Ireland, Isle of Man and Isles of Scilly
- £800 Republic of Ireland, Scottish Islands, Channel Islands

Individual deliveries over these values will be delivered to you free of charge on either our own transport or on standard courier. Should you wish to have urgent delivery (e.g. overnight) on all or part of your order then this will be charged separately at our standard carriage rates.

For individual deliveries less than these values, carriage will be charged at our standard carriage rates based on the level of urgency you require.

Our standard carriage rates will be discussed with you at the time of ordering, but if you would like a copy of our current rates, we are happy to provide that to you. We reserve the right to amend our carriage rates without notice based on changes in market price.

Direct to Site Deliveries

A surcharge will be added for all direct to site deliveries over and above standard carriage rates.

Claims for Damaged Goods or Short Deliveries

Any claims for goods which are damaged at the point of delivery, or where the delivery is short to the quantities advised on the delivery note, must be advised within three working days of delivery for us to consider any claim. Claims may be advised verbally in the first instance, but must be followed up in writing within one week.

Prices

All prices quoted exclude VAT, which will be charged on all invoices at current rate prevailing at the date of invoice.

We reserve the right to alter our prices without notice.

Payment

Where a trading account is offered, payment is required at the latest 30 days after the end of each month for invoices issued in that month. Should your account not be paid on time we will contact you to arrange immediate payment to bring your account up to date. We reserve the right to suspend any further deliveries if your account is overdue.

Title and Ownership of Goods

Title and ownership of goods shall not pass to the purchaser until payment has been received in full and monies have cleared through the bank.

Cancellation of Orders

Cancellation of orders cannot be accepted unless prior negotiation with us has taken place and any cancellation request must be made in writing. Where an order is for manufactured or bespoke items and manufacture has commenced then any cancellation will incur a charge to cover the costs already committed.

Alteration of Order

Order amendments can only be accommodated without cost prior to manufacture. Charges will be made for changes required after manufacture has commenced.

VAT

VAT will be charged on all products at current rate, at the date of invoice.

Stocked Products

We carry certain products in stock.

Return of Stocked Products

Stocked products may not be returned without our prior agreement, which must be confirmed by us in writing, and must be in a fully re-saleable condition and in the original packaging.

Once agreed by us, you may return the products to us using a delivery method of your choice. If we agree to collect the products from you then we may charge for collection in accordance with our standard carriage rates.

An inspection and re-stocking charge of 30% of the value of re-saleable stocked products will be deducted from any credit note raised.

Non-Stocked Products

Many of the products in our brochure are not stocked and are made to order. If your order includes products which are not stocked and need to be manufactured, then you will be advised at the point of ordering.

Certain product variants are specially manufactured so we are unable to accept return of these items after delivery. If this is the case with products on your order we will make you aware of that fact, and will require you to sign and return an order confirmation acknowledging this.

Return of Non-Stocked Products

Where we are able to accept non-stocked products for return, then they may not be returned without our prior agreement, which must be confirmed by us in writing, and must be in a fully re-saleable condition and in the original packaging.

Once agreed by us, you may return the products to us using a delivery method of your choice. If we agree to collect the products from you then we may charge for collection in accordance with our standard carriage rates.

An inspection and re-stocking charge of 50% of the value of re-saleable non-stocked products will be deducted from any credit note raised, reflecting the non-standard nature of the products.

Delivery Estimates

Delivery estimates are given in good faith. We strive to adhere to our delivery promises, however we do not accept responsibility for any loss, which may occur from late deliveries.

Manufacture of Goods Made to Customer Specification

As a UK designer and manufacturer we are able to produce bespoke products to customer specifications. All such enquiries will be quoted for on request.

Due to the bespoke nature of such products, cancellation cannot be accepted once manufacture has commenced, and once delivered, goods cannot be returned and will be charged at the full price quoted. We will require you to sign and return an order confirmation acknowledging this prior to manufacture.

Our Warranty for bespoke designed products is limited to one year and covers material and manufacturing related issues only. Responsibility for the design of the bespoke products rests with you our customer.

Customised Colours

We are able to manufacture most of our products in a RAL colour of your choosing. There may be a coating surcharge, where this applies you will be advised at the point of ordering. Larger quantities will not attract any coating surcharge.

Wet and Damp Areas

We strongly recommend that only Stainless Steel products are used in wet areas i.e. Shower rooms, Bathrooms, Wet rooms and poorly ventilated rooms.

We do not recommend the use of mild steel products in these areas, and the warranty of mild steel products will be invalidated for any such usage.

Fixings

Please note fixings are not supplied. Screw holes in our flanges are drilled to fit screw size 8. Bolt holes are drilled to fit M8 bolts.

Specification of Goods

Bathex reserves the right to improve our product specifications without prior notice.

Commercial

Other than for personal injury claims (for which we keep insurance), the limit of any liability claim against us will be the value of the specific goods sold. We do not accept any liability whatsoever for consequential losses or damages however incurred.

The terms implied by sections 13 to 15 of the Sale of Goods Act 1979 are, to the fullest extent permitted by law, excluded from any contract we have with you.

Bathex Limited Warranty

We try and keep things simple, so, within the warranty periods detailed here, if it is our responsibility that something has gone wrong with the design, materials or manufacture of one of our products then we will replace, repair or refund the product at our discretion.

There are, however, a few things that we cannot include in this limited warranty offer.

Fair wear and tear

All our products are subject to wear during the life of the product, especially our moving hinge products (such as Hinge Arms and Shower Seats). The hinge components of these items can wear out after prolonged high usage and we would treat that as fair wear and tear. Similarly, there are products which do get dirty with soap grime, cleaning materials and water deposits (including shower curtains, shower seats, shower hooks, and back rest cushions) and this would also be treated as fair wear and tear. Finally, the surfaces of our products may become dull or scratched over time and again this would be treated as fair wear and tear. Fair wear and tear is not covered by our warranty.

Proper storage, use, installation, and maintenance

Our products are designed for the specific purposes that they are intended for, and the use of our products outside of the intended use would render any warranty invalid. The installation and use of any mild steel products in wet areas (including chrome plated products) will invalidate the warranty. Similarly, the incorrect storage or installation of our products will impair the proper function and if the reason for a problem is caused for these reasons then, again the warranty will not apply. Finally, the products do need to be looked after properly in accordance with our 'Care and Maintenance Instructions' and failure to follow these instructions will render the warranty invalid. A common occurrence is where products have been damaged by excessively strong bleach, acids or alkalis.

Malicious or accidental damage

Our warranty does not cover any damage to products for malicious or accidental reasons. This includes breakage of any glass items such as our glass shelves.

Warranty Claims

If you believe you have a claim against our warranty, then please contact us by phone or e-mail and we will promptly evaluate your claim and fix it if it is our fault or explain clearly to you why it is not something we can cover.

Distinction Range

Stainless Steel	10 Years
Wooden Products	3 Years

Professional and Essential Ranges

Stainless Steel	3 Years
Mild Steel	1 Year
Plastic	1 Year
Accessories	1 Year

Care and Maintenance Instructions

Our products are very robust, and made from high quality materials, but they can be damaged by not following the correct care, cleaning and maintenance processes.

Our products should ideally only be cleaned with a damp cloth using a mild detergent or soap.

Where it is necessary to use surfactants or cleaning chemicals then they must be diluted in accordance with the manufacturer's instructions, or ready mixed in concentrations appropriate to the environment being cleaned. Lemon based cleaning solutions should be avoided as they are known to be quite acidic and can attack certain surfaces such as our stainless steel products.

Using undiluted bleach, concentrated acids or alkali's, chloride solutions and any hydrochloric acid based cleaners will damage the surfaces of our products and these must be avoided. Our warranty will not apply in cases where there is clear chemical attack to the surfaces.

Using scouring powders or cleaning materials with abrasives within the liquid (e.g. CIF) will cause a scouring mechanical cleaning action to take place which can damage the surface. Painted surfaces will become dulled. Mirror polished surfaces will be scratched and dulled. Sateen polished surfaces can accommodate this cleaning reasonably well but only if the direction of the polish grain is followed. It is best to avoid such cleaners unless there really is no option to remove accumulated deposits. If the product surface is damaged by such cleaners, then our warranty will not apply.

Finally, where hard water deposits are a problem then it is important to keep up with cleaning the lime scale deposits with a suitable lime scale cleaner (suitably diluted). If the scale builds up to a significant extent then it is likely to need some form of mechanical or abrasive cleaning which is likely to damage the surface of the product. Keeping any product pristine in a hard water environment is difficult and it is likely that products will become dulled and some deposits experienced in these environments. This is not a function of our products and is not covered by our warranty.

Replacement Parts

The most commonly requested spares items (to replace items which have become dirty due to fair wear and tear, or being lost) are priced in this table. If there is something you think you need which is not listed, then please contact us by phone or email and we will do our best to assist.

Normal delivery charges and rules will apply to these items.

Code	Description	Min Qty
SHST	Replacement Plastic Shower Seat Lid – White	1
SHSTBLK	Replacement Plastic Shower Seat Lid – Black	1
SHSTBLU	Replacement Plastic Shower Seat Lid – Blue (RAL 5011)	1
SHSTC	Replacement Plastic Shower Seat Lid – White (Side Bumps)	1
